

Elastic polymer series

HC-R7

More area in each elastic module.

Medium-soft

340 × 340

Tile size / mm

16 mm

Thickness

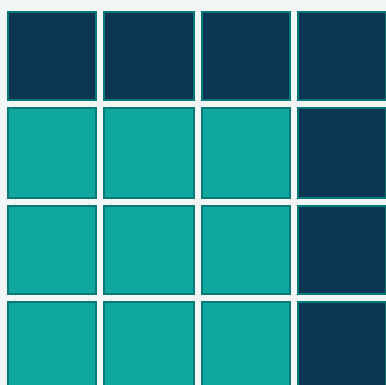

465 g

Weight per tile

Soft plastic elastomer

340 mm tiles for broad activity zones

HC-R7 uses a 340 mm footprint in a 16 mm elastomer profile. Each tile covers 0.1156 m², offering a larger module than the 300-307 mm formats in this series.

Module layout concept

0.1156 m²

Nominal area per tile. A 340 × 340 mm module gives your plan a clear grid for color zones and edges.

Allow for cuts, edges and spare tiles when ordering.

01

Elasticity through the material

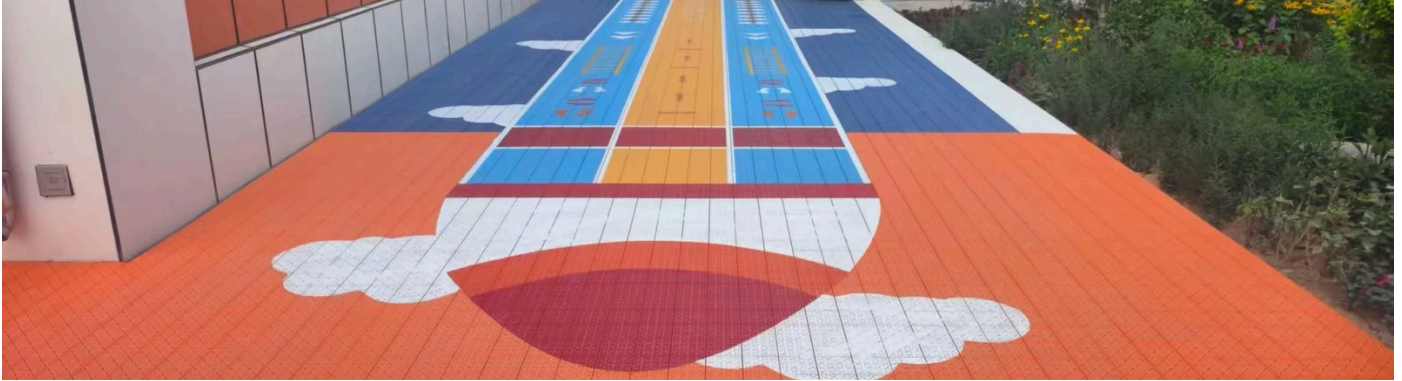

A soft plastic elastomer defines this series. Choose the sample feel around the daily activity and user group.

02

Make the space clear with color

Separate playing and surrounding areas with contrasting colors. Confirm the available colors and line-marking plan for your project.

Space for daily movement

Everyday children's activity

For ground-level games, movement and ordinary activity zones. An elastic material and color layout help shape the space around its daily use.

Application illustration

Recreational volleyball

A candidate for daily practice and shared recreation courts. Compare a sample for the feel you prefer and plan net posts, clearances and line markings together.

Application illustration

For ground-level activity. Areas beneath elevated play equipment need a separately specified impact-protection system.

Choose your configuration

340 × 340 mm · Tile length × width

HC-R7	Medium-soft
Thickness	16 mm
Tile weight	465 g
Tiles / carton	50
Area / carton	5.78 m ²
Gross / carton	24.35 kg

Packing: Medium-soft

Net: 23.25 kg · 72 × 36.5 × 42 cm

Approximate carton dimensions. Pallets and extra packaging are additional.

Installation planning

Use a stable, level base. Coordinate drainage, edges, expansion gaps and line markings with the installer.
