

Elastic polymer series

HC-R3

Elastic modules for everyday activity.

Medium-soft

306 × 306

Tile size / mm

13 mm

Thickness

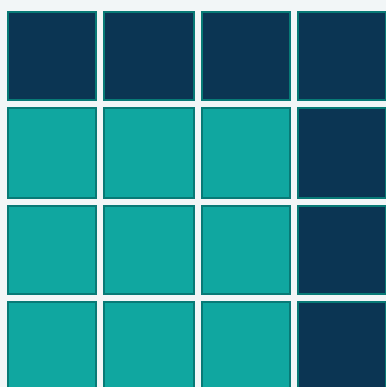

348 g

Weight per tile

Soft plastic elastomer

A 13 mm profile for shared spaces

HC-R3 combines a 306 mm module with a 13 mm soft plastic elastomer profile. Consider the medium-soft version for ordinary children's activities and shared recreation spaces.

Module layout concept

≈ 0.0936 m²

Nominal area per tile. A 306 × 306 mm module gives your plan a clear grid for color zones and edges.

Allow for cuts, edges and spare tiles when ordering.

01

Elasticity through the material

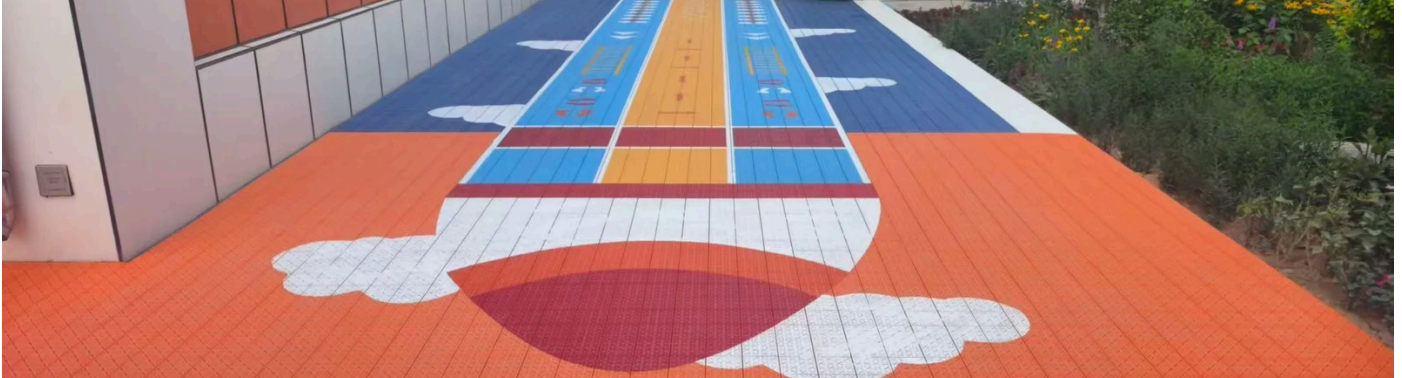

A soft plastic elastomer defines this series. Choose the sample feel around the daily activity and user group.

02

Make the space clear with color

Separate playing and surrounding areas with contrasting colors. Confirm the available colors and line-marking plan for your project.

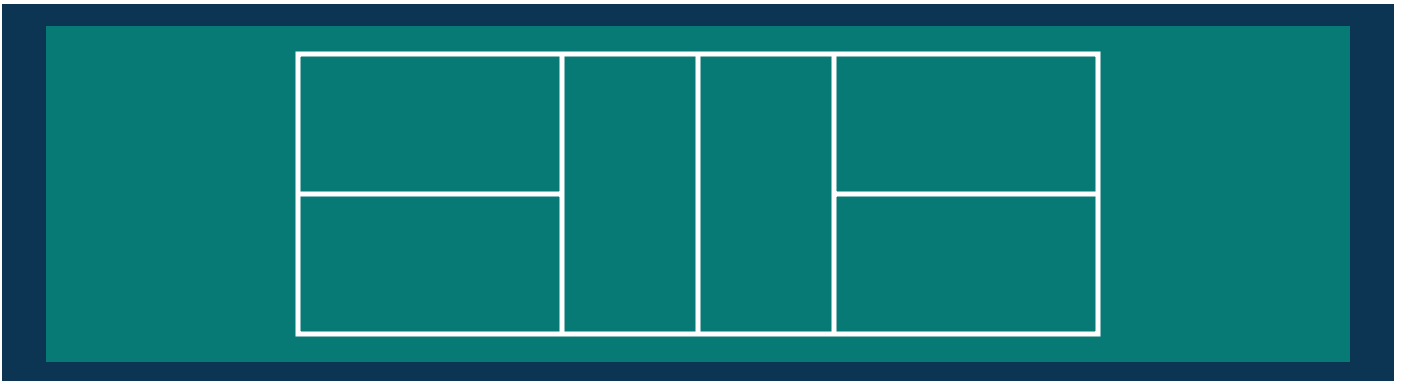

Space for daily movement

Everyday children's activity

For ground-level games, movement and ordinary activity zones. An elastic material and color layout help shape the space around its daily use.

Application illustration

Recreational pickleball

Configuration: Medium-soft

Plan a dedicated court or marked shared space. Compare the tile sample with your intended ball and footwear before choosing the court surface.

Layout concept · not to scale

For ground-level activity. Areas beneath elevated play equipment need a separately specified impact-protection system.

Choose your configuration

306 × 306 mm · Tile length × width

HC-R3	Medium-soft
Thickness	13 mm
Tile weight	348 g
Tiles / carton	80
Area / carton	7.4909 m ²
Gross / carton	29.29 kg

Packing: Medium-soft

Net: 27.84 kg · 64 × 64 × 28 cm

Approximate carton dimensions. Pallets and extra packaging are additional.

Installation planning

Use a stable, level base. Coordinate drainage, edges, expansion gaps and line markings with the installer.
